

# Clover Crew: Charity brings income

Clover Crew is a project where users contribute USDC to a smart contract. Daily deductions are made from this pool and paid out randomly to one of the participants.

# What is Clover Crew?

Clover Crew is an innovative project that enables users to participate in charitable events and earn income by transferring USDT into a smart contract. Each day, a small amount of 0.1 USDT is deducted from each depository, and the accumulated funds are then randomly distributed among one or more fortunate individuals. With a 10% commission deduction on payments, this unique platform aims to make the world a better place through charitable. It also provides an opportunity to attract new users and contribute to the development of the project.

# How does it work?

01

## Deposit

Users deposit USDT into a smart contract where funds are blocked.

02

## Count

0.1 USDT is debited from each user's deposit every day, creating a common pool

03

## Payment

The user or users who deposited the funds are randomly selected for the payout.

# Clover Crew

## **Chance**

Make the world a better place and get a chance for yourself.

## **Safety**

A smart contract ensures the safety of funds

## **Community engagement**

Become a part of an active and supportive community

# A reliable and transparent Smart contract.

The CLOVER CREW project allows users to deposit USDT into a smart contract, which will then be locked. Every day, 0.1 USDT will be withdrawn from each user's account who has deposited funds and randomly distributed to one or more other users who have also deposited funds. When funds are paid out, a 10% fee will be deducted and distributed as follows: 25% to virtual users, 25% for the referral program, 40% to CCTO token holders, and 10% to the platform itself. By using transparent smart contracts, the project ensures trust between users and fairness in the allocation of funds.

# How the commission will be used

## 01

### **Virtual users**

25% of the commission will be used to create virtual users, they will replenish the general pool daily, while they will not be taken into account when choosing the recipient of funds

## 02

### **Referral program**

25% of the commission will be distributed among the participants of the referral three-level program, the extra funds will be used to create virtual users

## 03

### **Clover Crew Token (CCTO)**

CCTO token holders will receive 40% of the commission, provided that the token is blocked on the platform. The extra funds from tokens that are not blocked on the platform will be used to create virtual users

## 04

### **Platform**

10% of the commission will be used for the maintenance of the project, marketing and organization of charity events. The funds received by the project from the CCTO token will also be used for charity

# Additional grounds

## Community

Ensuring positive change through collective action.

## The driving force

To have a significant impact on society

## Together We can

Creating opportunities for a better future

## Inspiring hope

Inspiring change, step by step

# Marketing

Based on the fact that the project requires daily visits to its website or application, it is possible to assume that in the future, advertising could be used as a source of income for the project. For instance, we could offer advertisers the opportunity to replenish the number of virtual users and, based on the amount they contribute, display their rating on the website's homepage.

# Achieving Financial Freedom: Clover Crew

01

## **CCTO Token Holders**

Annual income per 1,000,000 CCTO ranges from \$146\* to \$1,460\*.

02

## **Charity**

The amount of funds ranges from \$58,400\* to \$584,000\* per year.

03

## **Referral program**

Referral program participants will be able to receive payments from \$91250\* to \$912,500\*

04

## **Pool Recipients**

The amount of funds received never exceeds \$100,000. If the number of users is more than 1,000,000, the pool is divided into 2 or more recipients, depending on the amount of funds in the pool.

\*for calculations, indicators for the number of users from 100,000 to 1,000,000 are used.

We have created a project that is accessible and understandable for any inhabitant of the planet, with the maximum possible benefits and personal income.
